

IN THE SPECIFICATION

Please replace the paragraph beginning at page 4 line 4 with the following rewritten paragraph:

--The solid objects 30 may be selected from long acting slow releasing solid drugs, slow releasing tablets, pace makers, threads in subcutaneous caves, contrast media, etc., capsules for receiving fluid or powder medicines, etc., or slow releasing agents, such as a polymer of nitroglycerin and ~~catgut~~ CATGUT, a polymer of conjugated estradiol and ~~vieryl~~ VICRYL, a polymer of metildigoxin and ~~dexon~~ DEXON, etc., or goat intestines for engaging into the portions or areas or lines where the acupuncture points 73 are located.--;

Please replace the paragraph beginning at page 6 line 11 with the following rewritten paragraph:

--When either of the polymers of the slow releasing agents is selected and injected into the skin of the users, the slow releasing agents may be gradually released into the bodies of the users. For example, the polymer of nitroglycerin and ~~catgut~~ CATGUT may be gradually released into the bodies of the users for more than three (3) weeks, the polymer of conjugated estradiol and ~~vieryl~~ VICRYL may be gradually released into the bodies of the users for up to one month, and the polymer of metildigoxin and ~~dexon~~ DEXON may be gradually released into the bodies of the users for more than one month. The pace makers are normally required to be changed or replaced with the new ones every half a year, or every year.--.
